IDEATION

Title: News Tracker Application.

Team Members: Ganesh V, Mohan Ram M, Seeni Arivazhakan Team

Leader: Suriyanad S.

Cloud Computing is one of the fast growing and it offers flexible resources, and economies of scale. In this project we are going make an application which tracks the news. It is an **News Tracker Application** where it gives trusted news from the reputed news sources and it's just gives the simple sentence which saves the readers time and also it is high in knowledge. This application mainly focuses on the user friendly interface which will be created using HTML, CSS, Bootstrap and flask. The flask is a python web framework which is used for creating a flexible web application.
